09/07/2022 Events

30 years have passed since the Republic of Moldova has its own intellectual property system. I spent seven of them here at AGEPI. I met dedicated people, passionate about the profession, people who want to restart the economy, who develop the culture and make the Republic of Moldova be talked about with pride everywhere.

In the three decades, the Agency grew, developed and became cooperative and modern, renouncing clichés. We have a fine record of hundreds of events, thousands of patented inventions, almost ten thousand registered industrial designs and over one hundred thousand trademarks to which AGEPI has granted protection.

30 years after our establishment, we have many successes, and also a rich list of goals. With a lot of work, as well as with the help of the citizens who request our services, we will manage to fulfill them all.

Thank you for being and staying with us and for supporting us in our effort to perform!

Happy New Years of Success, AGEPI!

With deep respect,

Eugene Rusu,

Director General
