The International Exhibition Center “Moldexpo” hosted from March 16 to 19, this year, one of the most important events for the agro-industrial complex of the Republic of Moldova: the International Specialized Exhibition of Machines, Equipment and Technologies for the Agricultural Sector MOLDAGROTECH 2023, spring edition. Traditionally, the exhibition was also accompanied by the Fair of saplings and planting material.

The event brought together over 100 participants - producers, distributors and experts from the Republic of Moldova, Austria, Germany, Italy, Latvia, Poland, Ukraine and Hungary.

The most diverse models of agricultural machines and equipment, modern technologies, including digitization, intensive crop growth, fertilizers and plant protection products, and seed material were exhibited at the exhibition.

Specialists of the State Agency on Intellectual Property (AGEPI) participated in the exhibition with promotion, information dissemination and consultancy activities in the field of intellectual property protection. Promotional materials were also distributed, as well as information on intellectual property screening services.

Visitors could participate in the exhibition’s business program, which included seminars, round tables, car presentations, etc. Scientists, specialists, experts from fields related to the agricultural sector discussed aspects related to the capitalization of investments, the financing of the sector (including for photovoltaic installations), the use of solar panels; modern technologies of animal husbandry, disease control and prevention, etc. A current theme that was addressed in the business program was precision agriculture through the application of digital technologies.
