03.02.2025 События

The National Exhibition “Made in Moldova” took place from January 29 to February 2, 2025, at the IEC “Moldexpo”. The 22-nd edition entitled “At Home! Authentic! Native!” was organized by the Chamber of Commerce and Industry of the Republic of Moldova (CCI of the Republic of Moldova), under the patronage of the Government of the Republic of Moldova, with the aim of supporting local producers, promoting competitive products on the domestic and foreign markets, attracting investments, and intensifying public-private dialogue.

The inauguration ceremony brought together high-ranking officials and representatives of the business environment from the country and abroad, highlighting the importance of the event for the national economy and the development of international trade relations.

Organized under the concept of promoting the local product by connecting it with national trade networks, the National Exhibition “Made in Moldova” brought a significant increase in the participation of new companies, bringing together over 350 exhibitors.

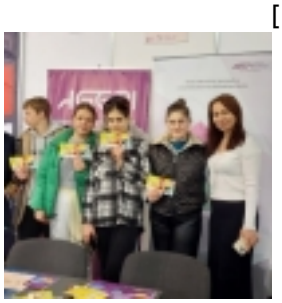

The State Agency on Intellectual Property participated this year in the National Exhibition “Made in Moldova” with an information stand. AGEPI specialists offered free consultations on the registration of intellectual property objects, distributed promotional materials in the field to both exhibitors and visitors, promoted the International Specialized Exhibition “INFOINVENT” to be held in November 2025, as well as the Contest in the Field of Intellectual Property for Young People.

Over the years, the exhibition has become a tool for promoting local goods and services, testing them in terms of demand, consolidating positions on the market, and establishing cooperation contacts for business people in the country and abroad.
