03.03.2026 События

The State Agency on Intellectual Property (AGEPI) informs the interested public about the organization, on March 17, 2026, of the launch event of the Artificial Intelligence Infrastructure Interchange (AIII) Dialogue Platform, an initiative promoted by the World Intellectual Property Organization (WIPO).

The AIII Platform represents a new international cooperation framework aimed at facilitating dialogue on the technical and operational aspects of the intellectual property system in the context of the accelerated development of artificial intelligence and continuous technological transformations. The initiative aims to strengthen a coordinated and inclusive approach to the interaction between AI infrastructure and intellectual property rights protection mechanisms.

The launch event will bring together creators and rights-holders, developers of AI-based solutions, intellectual property experts, representatives of Member States and other relevant stakeholders. The dialogue will aim to identify emerging challenges, exchange best practices and explore opportunities to adapt the IP system to new technological realities.

The event program will include:

- presentation of the objectives and scope of the AIII Platform;
- high-level interventions from WIPO leadership and special guests;
- interactive discussions with international experts and other interested actors.

To participate *online*, on the zoom platform, access the registration form:
