The State Agency on Intellectual Property (AGEPI) participated in the spring edition of the International Specialized Exhibition (ISE) “Moldagrotech (spring)”, held from March 11 to 14, 2026, at the Moldexpo International Exhibition Center. The event, organized in cooperation with the Ministry of Agriculture and Food Industry and with the subsidy support of the Entrepreneurship Development Organization (ODA), brought together over 100 exhibitors from the Republic of Moldova and ten other countries.

AGEPI’s participation in this event represented an important opportunity to promote and disseminate information in the field of intellectual property (IP). During the exhibition, AGEPI specialists provided free consultation to participants and visitors on the national intellectual property protection system, with a special emphasis on the importance of protecting creations and innovations in the agricultural sector. Informative materials in the field of IP were also distributed.

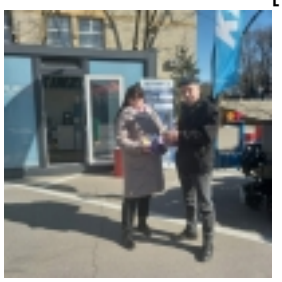

The exhibition agenda included conferences, seminars and roundtables addressed to producers, processors and young farmers. During the Spring Fair, seed and planting material, new grape varieties, as well as innovative solutions for the sustainable development of agriculture were presented.

The 2026 edition brought to the forefront global trends - the digitalization of agriculture, precision agriculture and sustainable practices - considered essential for the adaptation of the agricultural sector to the new economic and climatic realities. The event provided a platform for interaction for agricultural producers, equipment and technology suppliers, experts and research institutions, with the objective of promoting innovation and increasing competitiveness in agriculture.
