20.11.2026 События

InnoDays 2026 is being held on **16-20 November 2026** in Chisinau, an event dedicated to transformation of research results into technologies, products and partnerships with economic and social impact. Organized by Technovator, under the patronage of the Ministry of Economic Development and Digitalization and the Ministry of Education and Research, the event brings together representatives of academia, the research and innovation community, the business sector, investors, startups, international experts and public authorities. The State Agency on Intellectual Property (AGEPI) participates as a partner of the event, along with the Moldovan-Swiss Project Swiss PartnershIP Moldova and other relevant national and international organizations from the innovation ecosystem.

Under the theme **“From Lab to Market”**, InnoDays 2026 highlights the mechanisms by which research results can be exploited through technology transfer, entrepreneurship and cooperation between the scientific environment and the economic sector. In this context, intellectual property is an essential element for protecting inventions and new technologies, facilitating collaboration between researchers and companies, as well as attracting the investments necessary for the development and commercialization of innovations.

On **November 17-19**, AGEPI representatives participated in thematic activities dedicated to the fields of **GreenTech**, **HealthTech** and technology transfer. During the organized sessions and debates, the agency’s specialists promoted the role of intellectual property in the innovation process and provided information on the protection and exploitation of research results.

A reference point of AGEPI’s participation was the session “Invention Rights and Their Exploitation in the Republic of Moldova”, supported by Andrei Moisei, principal specialist in the Promotion and Training Section. The presentation addressed aspects of the legal protection of inventions, the management of intellectual property rights and the opportunities for exploiting research results through licensing, technology transfer and commercialization.

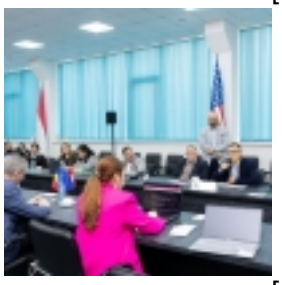

At the same time, AGEPI representatives participated in discussions dedicated to the development of the innovation ecosystem, the financing of DeepTech projects and the strengthening of cooperation between research institutions, universities and the business environment, topics addressed on the central day of the event, held on November 19 at Digital Park under the theme “Research Meets the Market”. The session “Protect your ideas & know-how”, dedicated to the protection of ideas and know-how and supported by Matthias Kaech, senior expert of the Swiss Federal Institute for Intellectual Property, highlighted the importance of integrating intellectual property in all stages of the innovation process, from research to the introduction of products on the market.

By engaging in InnoDays 2026, AGEPI reaffirms its commitment to contributing to the development of a competitive national innovation ecosystem, in which intellectual property contributes to the transformation of knowledge and research results into economic and social value, for the benefit of researchers, inventors, entrepreneurs and society as a whole.
